SFP+ AOC Cable

SFP-10G-AOC compatible 10G SFP+ active optical cable (AOC) consists of a multimode fiber optic cable terminated with SFP+ form factor modules on both ends. And 10G AOC cables offer convenient installation as the modules are permanently attached to each end. SFP+ to SFP+ 10G AOC optical cable is suitable for very short-distance transmission. It provides a cost-effective and low-power consumption way to build a 10Gb link between SFP+ ports of switches or routers with racks and across adjacent racks.
SFP+ DAC Cable

10GBASE-T module offers connectivity options at the following data rates: 100M/1G/10Gbps. It has the SFP+ form factor and an RJ-45 interface so that CAT5e/CAT6A/CAT7 cables can be used to connect to end points with embedded 10GBASE-T ports. They are suitable for distances up to 30 meters and offers a cost-effective way to connect within racks and across adjacent racks.

Fiber Optic Patch Cord

Indoor fiber optic patch cords connect optical devices like routers, switches and servers within buildings or data centers.
